

Vermont Yankee (VY): Closure and Clean-Up

A Public Forum

WHERE: Norwich Public Library, Norwich, VT
WHEN: Tuesday, 29 April at 7:00 pm

Vermont Yankee will cease operation later in 2014. The Sierra Club and the Citizens Awareness Network are sponsoring a forum to discuss the issues surrounding the decommissioning, clean up, and accountability of Vermont Yankee. The forum will feature seasoned nuclear activists Deb Katz, Executive Director of the Citizens Awareness Network, and Chris Williams, Organizer for Vermont Citizens Action Network. They will share their analysis of the proposed settlement agreement between the State of Vermont and Entergy regarding post-operation activities currently pending a decision by the VT Public Service Board.

How Entergy will address the issues of transition, closure, and decommissioning is more significant than ever. Recently questions have been raised about how the local community will be affected as well as the state and even the region.

Can citizens play a role in assuring that Vermont Yankee is properly dismantled, cleaned-up and radioactive waste safely stored? With the slow motion Fukushima disaster highlighting the vulnerabilities of Mark 1 reactors, how will the state deal with the increased vulnerability of this aged reactor?

Q&A and a period of open discussion will follow the panel presentation. Refreshments will be served.

FREE and OPEN TO THE PUBLIC!
