

# PILGRIM NUCLEAR REACTOR

JOHN F. KENNEDY stated in 1963 when he announced the atmospheric test ban treaty, which goes to the issue of involuntary vs. voluntary radiation exposure, among other things, "...the number of children and grandchildren with cancer in their bones, with leukemia in their blood, or with poison in their lungs (due to radioactive fallout from atmospheric nuclear testing) might seem statistically small to some, in comparison with natural health hazards. But this is not a natural health hazard...and it is not a statistical issue. The loss of even one human life, or the malformation of even one baby...who may be born long after we are gone...should be of concern to us all. Our children and grandchildren are not merely statistics toward which we can be indifferent."

CAN envisions a future of safety, prosperity, and health for all

- Where people generate electricity for their own homes and communities.
- Where local energy production and conservation create new local jobs.
- Where renewable energy is integrated into all of our homes and public buildings.
- Where it is easy for everyone to access sustainable and affordable energy sources.
- Where clean, efficient energy use is standard practice.
- Where family farms and locally owned businesses are the backbone of our communities.

And We Have What We Need To Provide For Our FUTURE!

- CAN IS WORKING FOR:
- License termination
  - Safer on-site waste storage
  - A future of affordable, integrated, clean and sustainable energy for everyone
